DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Buckner (4,301,783), which shows all of the claimed limitations. Buckner shows a gas fireplace including two plenums and a blower including an outlet at the top and a heat deflecting baffle 66. It is apparent from the figures that the baffle is angled between 35 and 75 degrees. This is very well known in the art, as heat rises it is important to direct the heated air towards the floor. It is also inherent that the deflector/hood/baffle is made of heat resistant material, as it would be a fire hazard otherwise.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3749

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Buckner (4,301,783), which discloses substantially all of the claimed limitations. Nevertheless, Buckner does not specify that the deflector is made of stainless steel. Official Notice is given that the use of stainless steel for deflector/hood/baffle is old and well known in the art. Such an arrangement has the clear and obvious benefit of providing for heat and corrosion resistance. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate use of stainless steel into the deflector discloses by Buckner, so as to provide for heat and corrosion resistance.

Allowable Subject Matter

6. Claim 13 is allowed.

7. Claims 3, 6-9, 11, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references disclose deflectors for fireplaces with many of the claimed components. Nevertheless, in order to avoid overburdening the applicant with redundant rejections, these references were not applied.
